'Safe and sound – women's safety on public transport'

SHEILA WATSON
DIRECTOR OF ENVIRONMENT AND RESEARCH, FIA FOUNDATION

London, March 21st 2016
SAFE CLEAN FAIR & GREEN Mobility for All
SAFE CLEAN FAIR & GREEN Mobility for All

OUR GLOBAL MOBILITY ACTION AGENDA

With several targets included in the new Sustainable Development Goals (SDGs), a key role recognised in the Paris Climate Change Agreement, and mobility at the core of the Habitat III ‘New Urban Agenda’ debates, this is a well-timed call for better mobility and transportation policy.

Among the key challenges, we need to tackle

- Safe and clean mobility for all
- Fair access to mobility for everyone
- Green mobility solutions

The FIA Foundation is working with governments, industry, and NGOs to address these challenges.

TRANSPORT IN THE GLOBAL DEVELOPMENT & CLIMATE AGENDAS

FIA Foundation: supporting SDG and climate action

SAFETY

CLEAN

FAIR

GREEN

In collaboration with partners, we are developing a range of initiatives to promote safe, clean, fair, and green mobility solutions for all.

- Safe mobility for all
- Clean air for all
- Fair access to mobility
- Green mobility solutions
CATALYTIC PARTNERSHIPS:

- Evidence
- Capacity-building
- Advocacy
Health target 3.6 builds on the UN Decade of Action for Road Safety with the ambitious objective of halving road traffic deaths by 2020. Target 3.9 seeks substantial reductions in deaths from air pollution.

Our Global Fuel Economy Initiative makes a vital contribution to Energy target 7.3, and we are working with the G20 to improve vehicle fuel efficiency.

Ensuring safe, sustainable and healthy urban mobility is at the heart of Cities targets 11.2 & 11.6, and must be at the core of the 2016 Habitat III debate.

Through our work on vehicle fuel efficiency and low-carbon mobility, the FIA Foundation supports the Climate Goal, and the wider UN climate change process.
THANK YOU
